

# OUR SYMBOLS

Snowbanner is made of nautical polyester fabric digitally printed with no limits of colours and graphics. It includes the inner flexible fiberglass pole for a perfect tension, 4 rings and fixing pegs. Ideal for snowparks, easy and quick to assemble and remove.

**Size**

Diametre 75 cm  
Diametre 150 cm

The customized windsock is a cone made from nautical polyester fabric with digital printing, resistant to the air flow and weathering. The wind, blowing inside the sock, changes its position, conveying information about its direction and intensity. At the same time, thanks to the customizing of the fabric, the windsock provides an advertising message with a great impact. The customized windsocks are delivered together with poles made of anodized aluminium, rotating hook, carry case and ground fixer.

**Windsock Full Kit**

- . Transportation bag
- . Fixer XL
- . Aluminium poles
- . Flag
